## B. Course Objectives and Learning Outcomes

**Course Description**

This course is presented in the form of projects on which the ideas of the projects are proposed for each group, and at each session the teacher follows the progress of the design and realization of each project. Each group will share the tasks between them according to a development cycle model (scrum or other), design all the UML diagrams corresponding to their project, implement their application, create their database, and deploy it on one platform.

**Course Main Objectives**

✓ Train students to prepare a scope of work that adequately describes their problem or project.
✓ Make groups to work in a collaborative way using the modern methods of software engineering (agile method) and to share the tasks perfectly between them.
✓ Use a methodology of analysis and design of systems in their project and define well its design
✓ Develop their systems using the appropriate languages, software and platforms or frameworks and test them.
✓ Gain practical experience in present their projects and prepare an associated document.

### 1. Course Learning Outcomes

## B. Course Objectives and Learning Outcomes

**Course Description**
- ✓ This course will introduce specification and formal verification in the development process of a software as well as we will learn a formal method: the method B and two formal verification techniques: (Proof of theorems, Model checking or model checking)

**Course Main Objective**
1. Raise awareness of the interest of introducing the methods formalities in the development cycle of a software.
2. Understand how to introduce formal methods in the development cycle of a software.
3. Define key terms in the field of formal methods
4. Present some formal specification formalisms
5. Analyze and evaluate the performance of formal verification techniques
6. Master the concept of software life cycle, and compare some classic and newer development processes.

## B. Course Objectives and Learning Outcomes

| | |
|---|---|
| **Course Description** |
| This course provides an in-depth exploration of the world of computer networking, covering both fundamental theoretical concepts and the practical skills needed to design, configure and manage effective networks. Students will gain an in-depth understanding of network architecture, communications protocols, network security, and emerging technologies. |
| **Course Main Objectives** |
| ✓ Develop an in-depth understanding of fundamental computer networking concepts, including models, protocols and architectures. |
| ✓ Learn to identify and formulate relevant research problems in the field of computer networks based on a critical analysis of existing literature. |
| ✓ Learn to design and use visual aids such as slideshows, diagrams, and demonstrations to reinforce technical communication. |
| ✓ Implement group projects to encourage collaboration within diverse teams, reflecting the reality of work environments. |
| ✓ Develop analytical skills to evaluate the performance of computer systems and networks. |
| ✓ Design and develop network applications using appropriate programming languages. |

### 1. Course Learning Outcomes

## B. Course Objectives and Learning Outcomes

**Course Description**

This course aims to discover the architecture of the Oracle DBMS and gives theoretical and practical basis on notions of the software administration of databases: DBA advanced objects (Sequences, Synonyms, Indexes, Views, Clusters, Snapshots), Transactions, data manipulation, administration tools and data access control (management of users, privileges and roles) based on two powerful languages SQL and PL/SQL.

**Course Main Objectives**

✓ Discover the architecture of the Oracle DBMS (memory structures, processes, storage structures) and administrate the database.
✓ Manipulate data with SQL (complex query)
✓ Acquire mastery of the PL/SQL language (basic concepts, functions, packages,.. )
✓ Create anonymous PL/SQL blocks, describes stored procedures and functions and Use sub-programs PL/SQL.
✓ Master the declaration of identifiers, cursors, and interception of exceptions and triggers.
✓ Effectively conclude soft database-related basics, principles, and manipulate with other disciplines.

### 1. Course Learning Outcomes

| | CLOs | Aligned PLOs |
|---|---|---|
| 1 | **Knowledge and Understanding** | |
| 1.1 | ✓ Discover the architecture of the Oracle DBMS (memory structures, processes, storage structures) and administrate the database. | PLO.K1 |
| 1.2 | ✓ Manipulate data with SQL (complex query) | |
| 1.3 | ✓ Acquire mastery of the PL/SQL language (basic concepts, functions, packages,.. ) | |
| 2 | **Skills** | |
| 2.1 | ✓ Create anonymous PL/SQL blocks, describes stored procedures and functions and Use sub-programs PL/SQL. | PLO.S2 |
| 2.2 | ✓ Master the declaration of identifiers, cursors, and interception of exceptions and triggers. | PLO.S7 |
| 2.3 | ✓ Effectively conclude soft database-related basics, principles, and manipulate with other disciplines. | |

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**
**Private Higher Education Institution,**
**State-approved under N° 05-2013**

## C. 1. Course Content

| No | List of Topics | Contact Hours |
|---|---|---|
| 1 | • Introduction and main concepts of databases and DBMS <br> • DBMS functional architecture | 3 |
| 2 | • Recall on SQL structured query language <br> • DBA advanced objects (Sequences, Synonyms, Indexes, Views, Clusters, Snapshots, etc) | 3 |
| 3 | Prior knowledge of PL/SQL (basics structures) and control structures | 3 |
| 4 | MidTerm-1 | 2 |
| 5 | Interaction with Oracle and explicit cursors <br> • Manipulate sub-programs <br> • Exception management in procedures and function <br> • Manage PL/SQL programs in packages | 7.5 |
| 6 | Triggers | 2 |
| 7 | Exam | 2 |
| **Total** | | 22.5 |

## C. 2. Practical Work Content

| No | List of Topics | Contact Hours |
|---|---|---|
| 1 | TP1 : Create a database and manipulate data <br> • Creating and modifying the structure of a database <br> • Manipulating data in a database (INSERT, DELETE, UPDATE) | 3 |
| 2 | TP2 : Interrogate a database <br> • Projections and simple restrictions <br> • Aggregate computation <br> • Complex restrictions and joins <br> • Embedded queries <br> • Clustering | 4 |
| 3 | TP3: PL/SQL Language elements (Blocks, variable, control structure) <br> • Blocks <br> • Variables <br> • Conditional and iterative control structures <br> • Complex types | 4 |
| 4 | TP4: Cursors <br> • Implicit cursor <br> • Explicit cursor | 3 |
| 5 | TP5: Stored procedures and functions and Exceptions | 2.5 |
| 6 | TP6: Triggers | 3 |
| 7 | Practical Exam | 3 |
| **Total** | | 22.5 |

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**
**Private Higher Education Institution,**
**State-approved under N° 05-2013**

## D. Teaching and Assessment

### 1. Alignment of Course Learning Outcomes with Teaching Strategies and Assessment Methods

| Code | Course Learning Outcomes | Teaching Strategies | Assessment Methods |
|------|--------------------------|---------------------|--------------------|
| **1.0** | **Knowledge and Understanding** | | |
| PLO.K1 | Discover the architecture of the Oracle DBMS (memory structures, processes, storage structures) and administrate the database. | Lecturing | Assignments, Quizzes , Exams, |
| | Manipulate data with SQL (complex query). | | |
| | Acquire mastery of the PL/SQL language (basic concepts, functions, packages,… ). | | |
| **2.0** | **Skills** | | |
| PLO.S2 | Create anonymous PL/SQL blocks, describes stored procedures and functions and Use sub-programs PL/SQL. | Lecturing/ Lab demonstration | Assignments, Quizzes , Exams, |
| PLO.S7 | Master the declaration of identifiers, cursors, and interception of exceptions and triggers. | | |
| | Effectively conclude soft database-related basics, principles, and manipulate with other disciplines. | | |

### 2. Assessment Tasks for Students

| # | Assessment task* | Week Due | Percentage of Total Assessment Score |
|---|------------------|----------|--------------------------------------|
| 1 | Practical Work (written or oral) | Weekly | 15% |
| 2 | Quizzes, Homework assignments | Random | 10% |
| 3 | First mid Term | 8 | 25% |
| 5 | Final Exam | 16 | 50% |

## E. Student Academic Counseling and Support

| Arrangements for availability of faculty and teaching staff for individual student consultations and academic advice : |
|---|
| 1- Office hours |
| 2- Blackboard interface |

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**

## B. Course Objectives and Learning Outcomes

| **Course Description** |
| --- |
| The "Artificial Intelligence" course covers the basic notions and concepts of artificial intelligence, learning paradigm, Supervised learning, Reinforcement learning, Unsupervised learning and Machine learning: (Multi Layer Perceptron) |
| **Course Main Objective** |
| ✔ Acquire prior knowledge of artificial intelligence. |
| ✔ Understand the supervised machine learning algorithms (k-Nearest Neighbors, Linear Models, Adaboost algorithm, Decision Trees, …) |
| ✔ Master supervised learning (Classification and regression) and Unsupervised Learning (preprocessing and scaling, clustering, ...) |
| ✔ Build, train and evaluate a neural network classifier (Multi Layer Perceptron: MLP). |
| ✔ Study the Model Evaluation and Improvement. |
| ✔ Analyze, Design and develop software related to artificial intelligence, with taking in consideration its static, dynamic and ergonomic aspects with recognition and respect of planning issues. |

### 1. Course Learning Outcomes

| CLOs | | Aligned PLOs |
| --- | --- | --- |
| 1 | **Knowledge and understanding** | |
| 1.1 | ✔ Acquire prior knowledge of artificial intelligence. | PLO.K1 |
| 1.2 | ✔ Understand the supervised machine learning algorithms (k-Nearest Neighbors, Linear Models, Naive Bayes Classifiers, Decision Trees, …) | PLO.K1 |
| 1.3 | ✔ Study the Model Evaluation and Improvement. | |
| 2 | **Skills** | |
| 2.1 | ✔ Master supervised learning (Classification and regression) and Unsupervised Learning (preprocessing and scaling, clustering, ...) | PLO.S2 |
| 7.1 | ✔ Build, train and evaluate a neural network classifier (Multi Layer Perceptron: MLP). | PLO.S7 |
| 7.2 | ✔ Analyze, Design and develop software related to artificial intelligence, with taking in consideration its static, dynamic and ergonomic aspects with recognition and respect of planning issues. | PLO.S7 |

## B. Course Objectives and Learning Outcomes

| **Course Description** |
| --- |
| This course deals with the most widespread English proficiency exam that tests business English skills. |

**Course Description**

This course deals with the most widespread English proficiency exam that tests business English skills.

Topics of this course are related to business English and computer science. They are meticulously selected among the most used themes in the TOEIC test.

This course would give an insight of the TOEIC test and give tips that would help managing the time of the exam.

Grammatical points and vocabulary are taught in context.

This course is student centred and incorporates the 21st century skills in the ELT (English Language Teaching) classrooms, hence, creativity, collaboration, critical thinking, and communication are crucial components of the learning process.

**Course Main Objective**
- listen for general information and listening for details
- Reading for general information and reading for details
- Demonstrate an advanced understanding of computer science engineering principles
- Analyse graphics, visuals, tables, and diagrams orally or transfer them into a written text.

### 3. Course Learning Outcomes

| | CLOs | Aligned PLOs |
| --- | --- | --- |
| 1 | **Knowledge and Understanding** | |
| 1.1 | Demonstrate an advanced understanding of computer science engineering principles | PLO K.1 |
| **2** | **Skills** | |
| 2.1 | Analyse graphics, visuals, tables, and diagrams orally or transfer them into a written text. | PLO. S1 |
| 2.2 | Analyse different types of writing documents in English | PLO S.5 |

---

<u>**Course Description**</u>

This "Communication" course gives a clear vision of the French language of the professional type with its different articulations according to the situations of the communication itself.

The student should be able to:

- ✓ Acquire knowledge of organizational communication.
- ✓ Express themselves correctly in terms of written language and in the context of professional documents (letters, minutes of meetings, notes, press reviews, etc.)
- ✓ To present oneself in an internship or job interview on the basis of a good application file and a real psycholinguistic preparation.
- ✓ To obtain the necessary skills to really enter professional life.

<u>**Course Main Objective**</u>

- ✓ Acquire knowledge of organizational communication.
- ✓ To express oneself orally before an audience or a small group, in terms of expression as such, gestures, attitudes and mastery of the material assigned to it.
- ✓ Express oneself correctly in terms of written language and in the context of professional documents (letters, minutes of meetings, notes, files, press reviews, etc.), which presupposes an adequate command of the French language itself and of certain computer tools.

### 1. Course Learning Outcomes

| | CLOs | Aligned PLOs |
|---|---|---|
| 1 | **Knowledge and Understanding** | |
| 1.1 | Express themselves correctly in terms of written language and in the context of professional documents (letters, minutes of meetings, notes, press reviews, etc.) | PLO K.1 |
| | To present oneself in an internship or job interview on the basis of a good application file and a real psycholinguistic preparation. | PLO K.2 |
| **2** | **Skills** | |
| 2.2 | To express oneself orally before an audience or a small group, in terms of expression as such, gestures, attitudes and mastery of the material assigned to it. | PLO S.2 |
| | Express oneself correctly in terms of written language and in the context of professional documents (letters, minutes of meetings, notes, files, press reviews, etc.), which presupposes an adequate command of the French language itself and of certain computer tools. | PLOS.6 |
| | Acquire knowledge of organizational communication | PLOS.7 |
| **3** | **Values** | |
| 3.1 | -Acquire the necessary skills to enter professional life. <br> -Conducting a meeting: preparation, moderation, participation, evaluation of a meeting, conflict management, decision making. | V.4 |

### C. Course Content

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**
**Private Higher Education Institution,**
**State-approved under N° 05-2013**

| No | List of Topics | Contact Hours |
|---|---|---|
| 1 | Presentation of the course and level test through a discussion topic. | 2 |
| 2 | Fundamental concepts of communication (Process, means, functions and obstacles...) | 2,5 |
| 3 | Techniques of modern professional communication (supporting text) | 3 |
| 4 | Professional writing (report, minutes, note, summary, cover letter, CV...) | 3 |
| 5 | How to write a cover letter and a professional CV | 2,5 |
| 6 | Speaking (oral presentations...) and conducting meetings (preparation, evaluation and conflict management...) | 3,5 |
| 7 | Audio-visual session: videos to watch and comment on (Job interview, how to write a good CV, a covering letter, producing a professional e-mail...) | 3,5 |
| 8 | Pre-examination debriefing | 1 |
| 9 | Main review | 1,5 |
| **Total** | | 22,5 |

## D. Teaching and Assessment

### 1. Alignment of Course Learning Outcomes with Teaching Strategies and Assessment Methods

| Code | Course Learning Outcomes | Teaching Strategies | Assessment Methods |
|---|---|---|---|
| **1.0** | **Knowledge and Understanding** | | |
| K.1 K.1 | Knowledge of organisational communication Fundamental concepts of communication: awareness of the complex process of communication, identification of the means of communication, the functions of speech, the obstacles to communication. | Lecturing, speaking & writing | Assignments, Quizzes, Exams, |
| **2.0** | **Skills** | | |
| S.2 | Expressing oneself correctly in terms of written language and in the context of professional documents (letters, minutes of meetings, notes, files, press reviews, etc.), which presupposes an adequate command of the French language itself and of certain computer tools. | Lecturing Tutorials Courses project | Assignments, Quizzes, Exams, |
| S.2 | Professional writing: writing an agenda, a memo, a summons, letters, reports, minutes, etc. | | Assignments, Report, Quizzes, Exams, |
| **3.0** | **Values** | | |
| V.4 | Acquire the necessary skills to enter professional life. | - Lectures - Class discussions - Assignments - projects | Assignments, Report, Quizzes, Exams |
| V.4 | Conducting a meeting: preparation, moderation, participation, evaluation of a meeting, conflict management, decision making. | | Assignments, Report, Quizzes, Exams |

### 2. Assessment Tasks for Students

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**
**Private Higher Education Institution,**
**State-approved under N° 05-2013**

| | Assessment task* | Week Due | Percentage of Total Assessment Score |
|---|---|---|---|
| 1 | Practical Work (written or oral) | Weekly | 00% |
| 2 | Quizzes, Homework assignments | Random | 00% |
| 5 | Final Exam | 16 | 100% |

## E. Student Academic Counseling and Support

**Arrangements for availability of faculty and teaching staff for individual student consultations and academic advice:**

- Office hours

## B. Course Objectives and Learning Outcomes

**Course Description**

The course covers the basic knowledge related to entrepreneurship and the Business Plan.

The creation of a company and management of system is a state of mind, an intellectual value the course aims to give the different types of companies and their management systems in order to detect students with an entrepreneurial spirit.

This course represents a brief introduction to business creation. It describes the main characteristics of the management system and seeks to explain them. Also, to understand the business creation process from idea to the start of the business and the role of the contractor in each stage.

A management system is a key tool in helping to streamline the business processes and build-in efficiency. Implementation of the appropriate management system and certifying to the appropriate standard to your business improves business performance and embeds safe and sustainable practices into the operations.

The success of a business creation project requires the prior development of a complete market study. It will allow the bearer to assess the market potential in order to validate the viability of his project and then to adopt a relevant competitive positioning.

**Course Main Objective**

- ✓ Introduction to the concepts of a company, entrepreneur, entrepreneurship, business, a management system…
- ✓ Present the business
- ✓ Describe the dimensions of the company,
- ✓ Explain the main functions of the company,
- ✓ Define the business environment,
- ✓ Describe the current characteristics of the environment,
- ✓ Explain the relationship of the company with its environment.
- ✓ Describe the competencies of managers.
- ✓ Master the Business Management System (BMS).
- ✓ Understand the business creation process.
- ✓ Mastering the process from the idea to the project: have an idea, assess the opportunity, Business Plan, financial forecasts.
- ✓ Learn how to list the resources and the quantities needed for each step in the system.
- ✓ Define its positioning: define your market, segmentation, prioritize segments, marketing and sales plan.
- ✓ Mastery of the commercial and competitive environment.
- ✓ Develop the market study, the financial (apply financial indicators) and technical study.
- ✓ Master the structure and mode of operation: structure and organization, Business model, legal and financial aspects.
- ✓ Master the process from analysis to a successful start: risk identification and management, business creation market.
- ✓ Apply basics, principles, and theories to identify, formulate, and solve complex system management and creation business process.

## B. Course Objectives and Learning Outcomes

**Course Description**

The Functional Programming in Python course aims to help students become programmers capable of designing, implementing, and maintaining efficient and elegant functional programs in Python.

**Course Main Objective**

- Understand basic functional programming concepts and principles, such as higher-order functions, lambda expressions, recursion, function composition, and more.
- Understand how functional programming differs from other programming paradigms, such as imperative programming and object-oriented programming.
- Learn to use functional programming tools in Python, such as map, filter, and reduce functions, lambda expression syntax, generators, and list comprehensions.
- Learn how to create functional programs in Python, using techniques such as pure functional programming, data immutability, and recursion.
- Understand how functional programming can improve the readability, maintainability, and performance of Python code.
- Discover how functional programming can be used in applications such as data manipulation, signal processing, machine learning, and numerical analysis.
- Gain hands-on experience programming real-world examples in Python, such as creating programs to manipulate lists, arrays, and other data structures, as well as sample applications such as data analysis and machine learning.

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**
**Private Higher Education Institution,**

| This course covers the positioning and the typology of software architecture, the modeled software architecture, the architectural styles, the documentation of software architectures, the ADL, and the hibernate framework. |
| **Course Main Objective** |
| ✓ Introduce the software architecture: positioning, principles, paradigms, and typology. <br> ✓ Define the modeling styles. <br> ✓ Explain the architectural styles. <br> ✓ Define Data-centric approach. <br> ✓ Manage the design problems and ethics related to software architecture. <br> ✓ Design, conduct, analyze, and evaluate practices, projects, and experiments related to software architecture issues. <br> ✓ Master the physical and logical architectural styles. |

### 1. Course Learning Outcomes

| | CLOs | Aligned PLOs |
|---|---|---|
| | **Knowledge and Understanding** | |
| 2.1 | Introduce the software architecture: positioning, principles, paradigms, and typology. | PLO.K2 |
| 2.2 | Define the modeling styles. | |
| 2.3 | Define Data-centric approach. | |
| 3.1 | Explain the architectural styles. | PLO.K3 |
| | **Skills** | |
| 2.2 | Master the physical and logical architectural styles. | PLO.S2 |
| 2.4 | Design, conduct, analyze, and evaluate practices, projects, and experiments related to software architecture issues. | PLO.S4 |
| 2.5 | Manage the design problems and ethics related to software architecture. | PLO.S5 |

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**
**Private Higher Education Institution,**
**State-approved under N° 05-2013**

## C. Course Content

| No | List of Topics | Contact Hours |
|:---:|---|:---:|
| 1 | Introduction to the software architecture: positioning, principles, paradigms, and typology of software architectures. | 2 |
| 2 | Representation of software architectures: modeling styles | 2 |
| 3 | The 1+4 view model (semi-formal), The trilogy model (formal) | 2 |
| 4 | Representation of Software Architecture with UML | 3 |
| 5 | Architectural styles | 3 |
| 6 | Physical and logical architectural styles | 2 |
| 7 | Data-centric approach | 2 |
| 8 | MVC architecture | 2 |
| 9 | Documentation of ADL software architectures | 3 |
| 10 | ADL types, wright, Darwin | 3 |
| 11 | The persistence management | 2 |
| 12 | Architecture with persistence | 2 |
| 13 | Component-based architecture | 2 |
| **Total** | | 30 |

## C .1 Practical work Content

| No | List of Topics | Contact Hours |
|:---:|---|:---:|
| 1 | Diagrams of packages and components | 2 |
| 2 | Diagrams of deployments and sequences | 2 |
| 3 | Architectural styles | 3 |
| 4 | 1-tier data-centric architecture | 3 |
| 5 | ADL wright | 3 |
| 6 | ADL Darwin | 2 |
| **Total** | | 15 |

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**
**Private Higher Education Institution,**
**State-approved under N° 05-2013**

## D. Teaching and Assessment

### 1. Alignment of Course Learning Outcomes with Teaching Strategies and Assessment Methods

| Code | Course Learning Outcomes | Teaching Strategies | Assessment Methods |
|------|--------------------------|---------------------|--------------------|
| **1.0** | **Knowledge and Understanding** | | |
| PLO.K2 | Introduce the software architecture: positioning, principles, paradigms, and typology. Define the modeling styles. Define Data-centric approach. | Lecturing | Assignments, Quizzes , Exams, |
| PLO.K3 | Explain the architectural styles. | | |
| **2.0** | Skills | | |
| PLO.S2 | Master the physical and logical architectural styles. | Lecturing | Assignments, Quizzes , Exams, |
| PLO.S4 | Design, conduct, analyze, and evaluate practices, projects, and experiments related to software architecture issues. | | |
| PLO.S5 | Manage the design problems and ethics related to software architecture. | | |

### 2. Assessment Tasks for Students

| # | Assessment task* | Week Due | Percentage of Total Assessment Score |
|---|------------------|----------|--------------------------------------|
| 1 | Practical Work (written or oral) | Weekly | 25% |
| 2 | Quizzes, Homework assignments | Random | 00% |
| 3 | First mid Term | 8 | 25% |
| 4 | Final Exam | 16 | 50% |

## E. Student Academic Counselling and Support

**Arrangements for availability of faculty and teaching staff for individual student consultations and academic advice:**
- Office hours
- Blackboard interface

**Tunisian Republic**
**Private Higher School of Engineers of Gafsa**
**Private Higher Education Institution,**
**State-approved under N° 05-2013**

## F. Learning Resources and Facilities

### 1. Learning Resources

| | |
|---|---|
| **Required Textbooks** | 1.https://www.eyrolles.com/Informatique/Livre/architecture-logicielle-9782100578658/<br>2. editions-eni.fr/livre/architecture-logicielle-pour-une-approche-organisationnelle-fonctionnelle-et-technique-2e-edition-9782746099210 |
| **Essential References Materials** | Star uml, eclipse |
| **Electronic Materials** | • Lecture material in PPT<br>• Any Related material including the YouTube videos relating to engineering measurement<br>Blackboard |
| **Other Learning Materials** | NA |

### 2. Facilities Required

| # | Assessment task* | Week Due | Percentage of Total Assessment Score |
|---|---|---|---|
| 1 | Work carried | Weekly | 20% |
| 2 | Prototype realization | Random | 30% |
| 3 | Final Evaluation | - | 50% |

## G. Course Quality Evaluation

| Item | Resources |
|---|---|
| **Accommodation**<br>(Classrooms, laboratories, demonstration rooms/labs, etc.) | **classroom board software …** |
| **Technology Resources**<br>(AV, data show, Smart Board, software, etc.) | **data show;** |

## H. Specification Approval Data

| | |
|---|---|
| **Council / Committee** | Computer Engineering Council |
| **Date** | 07/02/2023 |
